

ADAM NOER HIDAYATULLOH

Senior Fullstack Developer & Engineering Deputy Lead

0822-9793-0060 | adamnoer62@gmail.com | linkedin.com/in/adam-hidayatullah-b25a87195 | portofolioadam.xyz | Jonggol, Bogor, West Java

PROFESSIONAL SUMMARY

Senior Fullstack Developer and Deputy Leader with 5+ years of experience in end-to-end system development and technical leadership. Proven track record leading cross-functional teams to build scalable, user-centric systems while optimizing the SDLC to accelerate deployment cycles and maintain system stability. Skilled in end-to-end architecture, database optimization, and system integration, with a strong focus on enterprise-grade application performance.

WORK EXPERIENCE

Fullstack Developer

May 2026 – Present

Wrapstation — Tangerang

- **AI-Powered Product Innovation:** Research and apply AI to build a Virtual Try-On (VT) tool for luxury watches using Computer Vision (OpenCV, TensorFlow), allowing customers to preview products virtually before purchase.
- **Defect Detection:** Deploy YOLO-based object detection to automatically identify product and watch damage or defects.
- **ERP Development:** Build and maintain the company's internal ERP system, including AI-integrated features powered by a self-trained, fine-tuned open-source LLM to support business process automation.
- **AI Integration:** Continuously expand applied AI/ML expertise (Computer Vision, open-source LLM training and fine-tuning) to embed intelligent features into internal tools and customer-facing products.

Senior Fullstack Developer & Deputy Leader – Strategic Management

Jun 2025 – Mar 2026

PT Bizera Digital Indonesia — Jakarta Timur

- **Engineering Leadership:** Partnered with the Head of Engineering to define the technical roadmap, align engineering goals with business objectives, and drive architectural decisions for scalable systems.
- **Team Mentorship & Growth:** Led and mentored a cross-functional team of developers through regular code reviews, technical workshops, and one-on-one sessions to foster a culture of "Engineering Excellence" and Clean Code.
- **Process Optimization:** Streamlined the Software Development Life Cycle (SDLC) by implementing Agile/Scrum methodologies and robust CI/CD pipelines, resulting in faster deployment cycles and higher release stability.
- **Stakeholder Collaboration:** Bridged the gap between product requirements and technical execution by collaborating closely with Product Managers and UI/UX designers to deliver user-centric solutions.
- **End-to-End Architecture:** Directed the development of complex, high-traffic web applications, overseeing everything from responsive frontend interfaces to resilient backend infrastructure.
- **Database & Performance Optimization:** Architected and optimized complex SQL database schemas, ensuring data integrity and high-performance query execution for enterprise-level applications.
- **System Integration:** Designed and maintained secure, scalable RESTful/GraphQL APIs and integrated third-party services (payment gateways, OAuth, cloud infrastructure).
- **Problem Solving:** Resolved critical technical bottlenecks and architectural challenges, maintaining 99.9% system uptime and a seamless user experience.

Senior Software Engineer

Mar 2022 – Apr 2025

PT Vaganza Solusi Internasional

- **Web Development:** Built web applications using the Laravel framework.
- **Daily Maintenance:** Administered network and system infrastructure, resolving technical issues during application development.
- **Project Collaboration:** Coordinated with other teams to ensure projects stayed on track and on time, and implemented the latest technologies to improve application performance.
- **Quality Assurance:** Upheld code quality standards and performed testing to ensure applications functioned properly.

Fullstack Web Developer

Oct 2024 – Mar 2025

Bima Global Study — Malang

- Partnered with another web developer and the UI/UX team to rebuild the company website from scratch, ensuring seamless functionality and user experience.

- Participated in migrating the website to WordPress in line with the company's platform decision.
- Built and maintained both front-end and back-end functionality of the website.
- Ensured the website was optimized for speed and security.
- Integrated tools and systems for e-commerce, client interaction, and content management.
- Diagnosed and resolved website bugs in collaboration with the other developer.

Fullstack Developer (Freelance)

Apr 2021 – Present

Freelancer — Bogor

- Web Development: Built web applications using a range of technologies and frameworks tailored to client needs.
- Database Design: Designed and maintained database systems for various client projects.
- Technical Support: Provided responsive technical support and resolved client issues in a timely manner.
- Client Requirement Analysis: Partnered closely with clients to understand their needs and ensure project requirements were met.
- Consulting: Advised clients on improvements to their websites and applications.
- Relationship Management: Cultivated strong client relationships through regular communication and on-time delivery.

EDUCATION

Politeknik Pos Indonesia — Bandung

Jun 2017 – Apr 2021

GPA: 2.99 / 4.00

SKILLS

Front-End: React, Vue.js, Next.js, Tailwind CSS, Three.js, Astro.js

AI / Machine Learning: Computer Vision (OpenCV, TensorFlow), YOLO Object Detection, Open-Source LLM Training & Fine-Tuning

Back-End: Laravel, Nest.js, Django, CodeIgniter

DevOps & Tools: Docker, AWS, CI/CD, Git, Linux, Vercel

Leadership & Soft Skills: Team Management, Communication, Database Management, Project Management
