Karya Salemba Empat (KSE)

KSE serves as a bridge for various companies and individuals to channel their donations to deserving candidates and the right soft skill development programs. In addition, KSE actively encourages and prepares scholarship recipients to become graduates with integrity, a strong sense of national identity, and love for their country, through a range of development programs.

Antrian PDAM

A web-based queue management system developed for a regional water utility service (PDAM). Built using Laravel and MySQL, this system allows customers to take queue numbers digitally and enables staff to manage and call queues in real-time.

Integrated push notifications alert customers when their turn is approaching, helping to reduce physical congestion and improve service efficiency.

The screenshot shows the user interface of the PERUMDA queue management system. At the top left is the logo for PERUMDA (Air Murni Tirta Kelimutu). The main heading is "MASUKAN NOMOR ID PELANGGAN" (Enter Customer ID Number). Below this is a text input field labeled "ID PELANGGAN" and a blue "Submit" button. At the bottom, there is a numeric keypad with buttons for digits 1 through 9, 0, a backspace icon, and a "CLEAR" button.

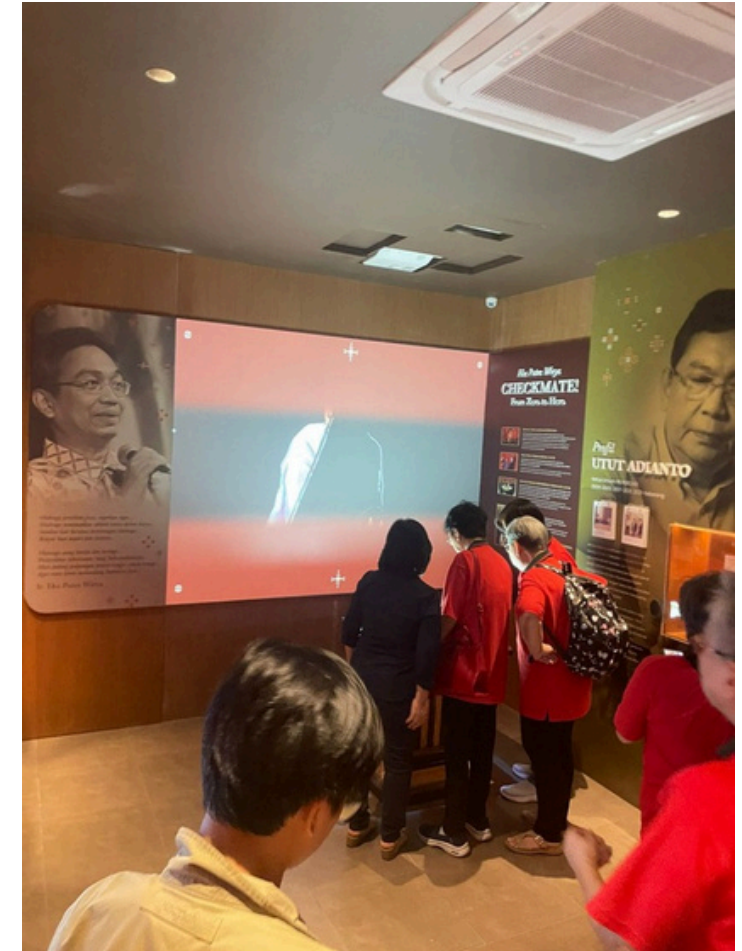

Photobooth scua

A web-based photo booth app built with React.js and Express.js, featuring Midtrans integration for payments and automatic photo delivery via email. Developed in collaboration with a well-known Indonesian Chess Grandmaster, the app allows users to take themed photos and receive them instantly after completing a secure transaction.

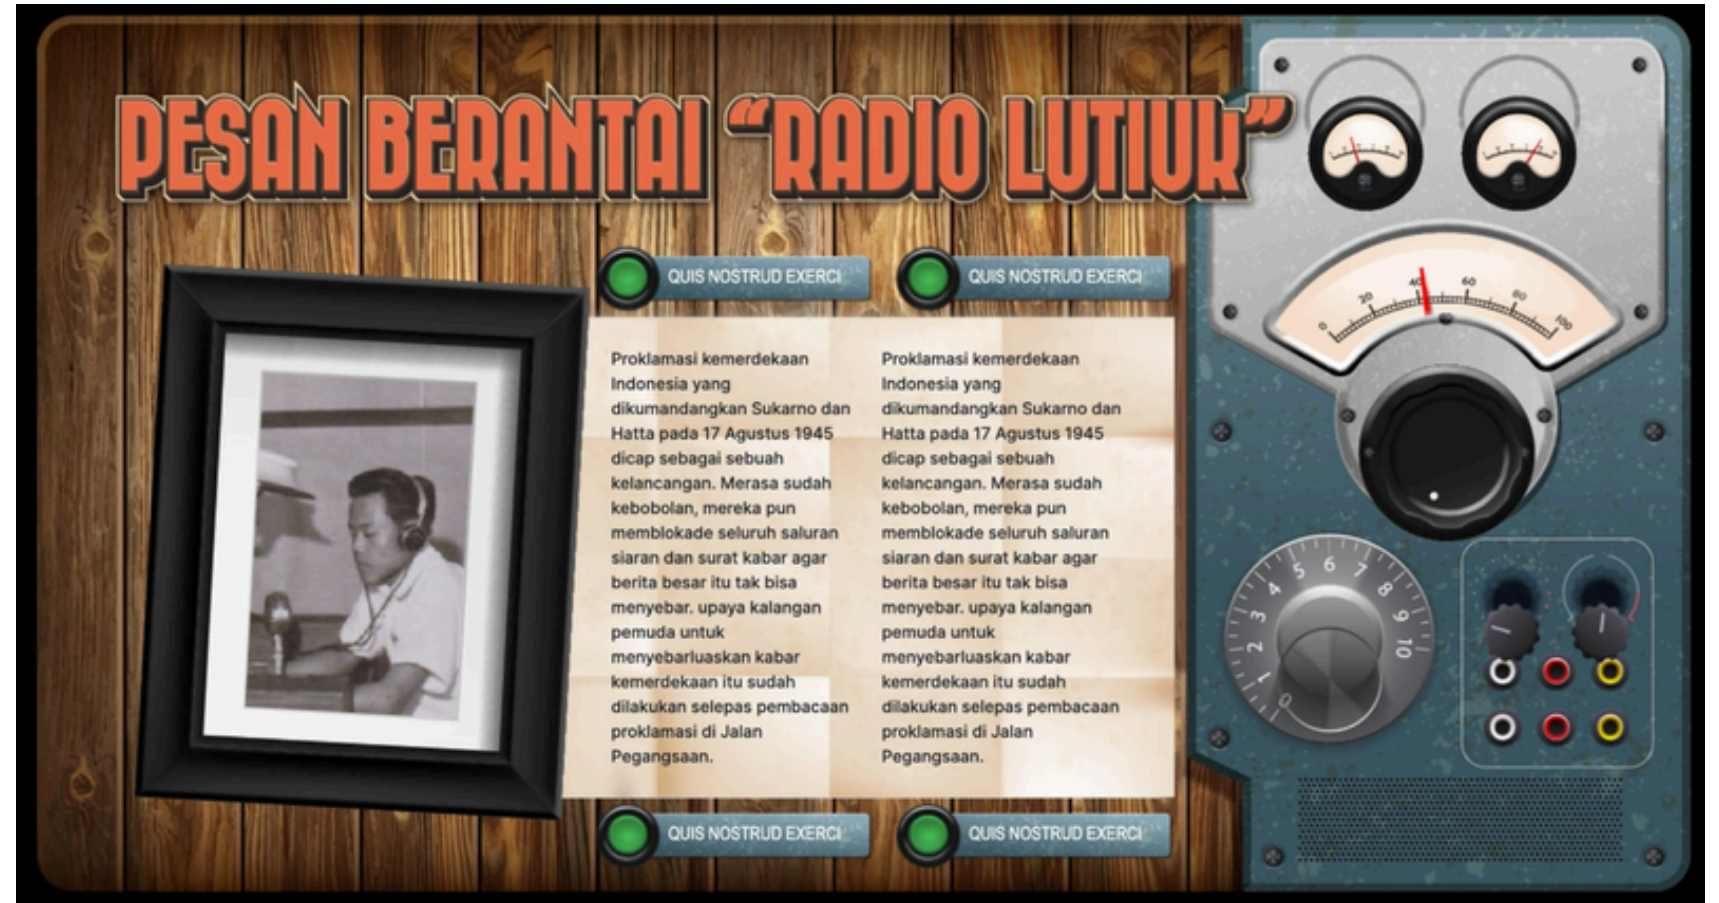

Interactive books

A smart interactive book that uses light and distance sensors to trigger dynamic responses such as audio or visual content. Built with Express.js for real-time data handling from sensors, this project bridges the gap between physical and digital storytelling—ideal for exhibitions, education, or smart libraries.

Interactive Museum PDRI

The Interactive Museum PDRI is a museum dedicated to commemorating the Emergency Government of the Republic of Indonesia (PDRI) during 1948-1949, when Indonesia fought to defend its sovereignty from the Dutch. The museum utilizes interactive technology and multimedia presentations to showcase the history of PDRI, its artifacts, and key information, offering an engaging educational experience for visitors about Indonesia's struggle for independence.

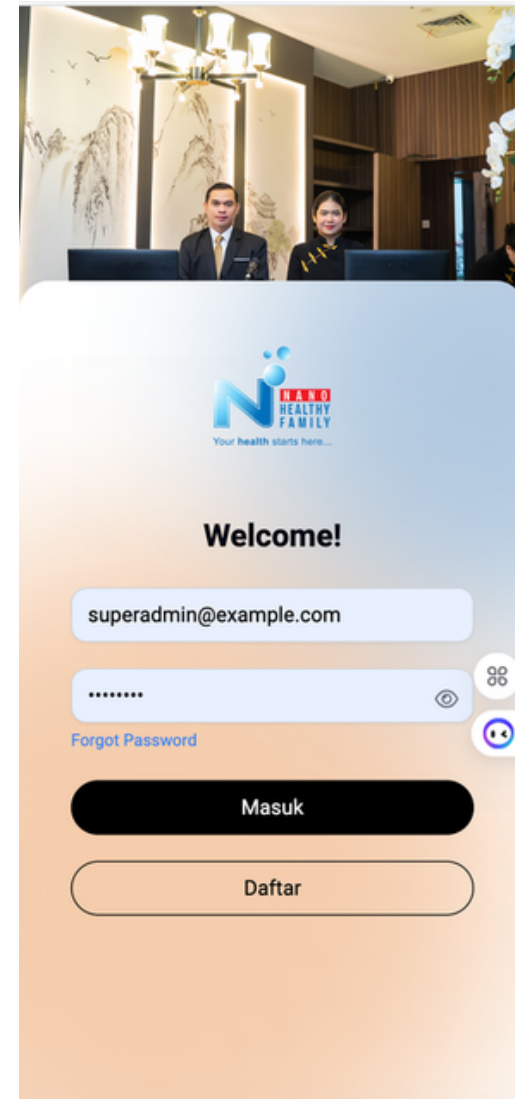

Kewrusahaan Upi

I developed a landing page for the Entrepreneurship Study Program at Universitas Pendidikan Indonesia using WordPress and Elementor. The website features a modern, responsive design that effectively presents key information about the program. The development focused on clean navigation, consistent branding, and accessibility for all users. By leveraging Elementor's visual builder, I created a professional layout without compromising performance. This landing page serves as the main gateway for prospective students and visitors to explore and learn more about the program.

Nano Reflexy

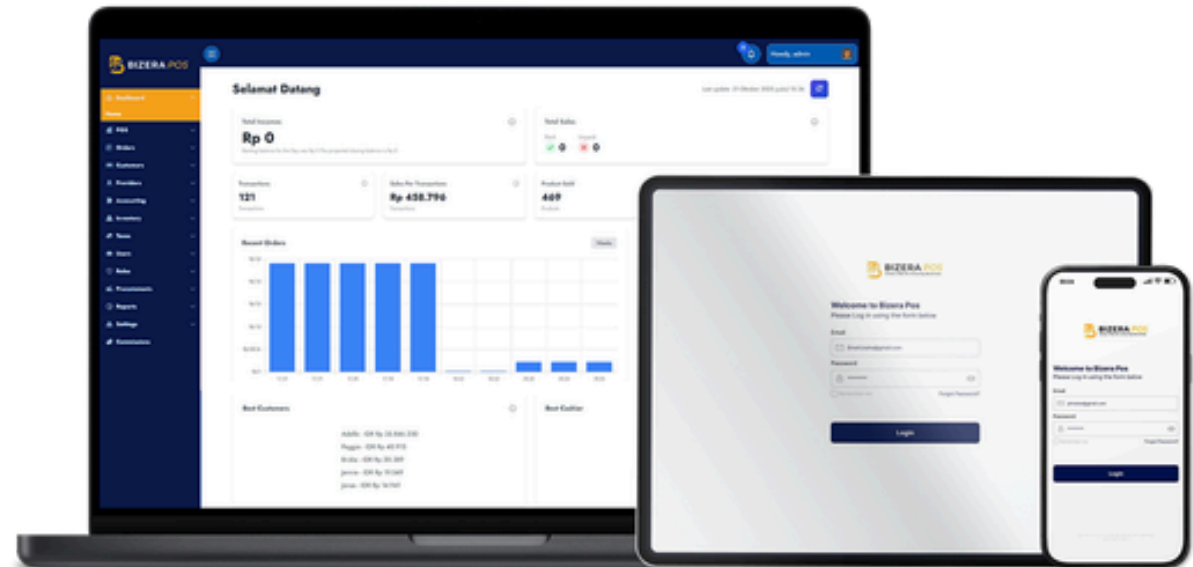

I developed Nano Reflexy, a full-featured web application for a spa and reflexology business, using Vue.js for the frontend and Laravel for the backend. The application includes a customer booking system, an integrated Point of Sale (POS) for service and product transactions, and a comprehensive employee management module. Admins can track and manage staff attendance, religious study sessions, overtime pay, meal allowances, and various operational expenses. The seamless integration between Vue.js and Laravel provides a fast, responsive user experience while supporting robust business workflows behind the scenes.
